

**The No. 1  
Bird Deterrent**

Australian Owned & Operated

Congratulations on purchasing the patented, wind assisted BIRD BUSTA rotating bird deterrent. The BIRD BUSTA bird deterrent is environmentally friendly, fully recyclable, UV stabilized and when fitted correctly will last for many years. The BIRD BUSTA bird deterrent offers a simple solution to bird related problems such as excrement and noise on and around boats, pontoons, decks, pools, jetties, roofs, antennas, clothes lines and many other applications. Due to the erratic movement and glistening effect of the BIRD BUSTA bird deterrent it will deter most species from any area in which it is placed. To be effective, the BIRD BUSTA bird deterrent must be fitted in an area that has at least a slight breeze and must be fitted horizontal to the ground and not on an angle.

**INSTRUCTIONS:**

- Step 1:** Loosen clamp screw (4) anti-clockwise half a turn.
- Step 2:** Extend arms (2) to required or maximum length (arms should be equi-distant).
- Step 3:** Twist arms (2) so that flaps (1) are in upright vertical position.
- Step 4:** Tighten clamp screw (4) clockwise (firmly).
- Step 5:** Use holes in base (9) to secure by screws or clamp (not included).

**IMPORTANT:** DO NOT remove arms (2) from clamp (3). Should this occur, arms (2) may be replaced in an inverted position.

**EXTRA FEATURES:** Retainer clip (6) reduces the possibility of the upper bearing (5) separating from the lower bearing (8) in strong winds, clip (6) must be in position before unit is operating. Should you need to stop the unit, simply remove clip (6) and insert into stop hole (7), be sure to return retainer clip (6) to original position before operating. To remove the entire assembly from the base (9) simply turn the lower bearing (8) clockwise (a quarter turn) and pull out. To replace, push the lower bearing (8) back in position and twist anti-clockwise until it locks into place, this feature is available on bayonet base model only. For application on a structure taller than a single storey home or for commercial use, it is recommended to use the BIRD BUSTA solid base series.

**WARNING:** This device is NOT a toy and is unsuitable for children. Due to the various applications for the BIRD BUSTA, fittings, brackets or clamps, etc are not supplied. Bird Busta (Aust) suggests that a suitable fitting, bracket or clamp etc be used to mount this device in an area that is unlikely to cause damage to property or injury to a person and should be fitted/mounted by a person with the required skills to do so.

**WARRANTY:** Bird Busta (Aust) warrants this product against faulty manufacturing, parts or workmanship for a period of 12 months from the date of purchase (receipt must be retained). If a defect arises during the warranty period, please return the product along with your original receipt to the place of purchase for a refund or replacement. The BIRD BUSTA bird deterrent bayonet base model is suitable for domestic purpose only and should NOT be fitted to a structure higher than a domestic one story building as this may void your warranty. BIRD BUSTA should be removed from it's base in the event of high winds as per the instructions above as this warranty does not cover the product in extreme winds. The warranty does not cover the misuse or poor fitting of the product and should only be used for deterring birds.
